

Dear

Hello! My name is

I'm writing you to voice my support for the **Tyler Clementi Higher Education Anti-Harassment Act** and the **Safe Schools Improvement Act**.

Persistent bullying can lead to psychological harm, truancy, substance abuse and potentially physiological consequences. Our federal government even has a website dedicated to the mission of ending bullying: Stopbullying.gov. Doing nothing is no longer an option, and these bills are common sense, cost little and can have a real impact.

These bills are a great step because they do just that: address the problem. It would fund programs to educate people about harassment and bullying.

I hope you take this letter into consideration when these bills are discussed. Also please be a leader in pushing for their passage

Sincerely,
